

WHAT IS CLAIMED IS:

1. A hockey playing table, comprising:

a main body;

a panel mounted on the main body;

5 a magnetic board mounted on the panel;

a disk movably mounted on the magnetic board; and

a circular magnetic plate mounted on a bottom of the disk and rested
on the magnetic board.

2. The hockey playing table in accordance with claim 1, wherein the
10 magnetic plate has a circular shape.

3. The hockey playing table in accordance with claim 1, further
comprising a loop-shaped boundary frame mounted on a periphery of the main
body.

4. The hockey playing table in accordance with claim 1, wherein the
15 magnetic plate has a contact face having a polarity the same as that of a contact
face of the magnetic board, so that the magnetic plate produces a repulsive
force to the magnetic board when the disk and the magnetic plate are rested on
the magnetic board.

5. A hockey playing table, comprising:

20 a main body;

a panel mounted on the main body;

a plurality of magnetic blocks each mounted on a top face of the panel;

a disk movably mounted on the panel; and

a magnetic plate mounted on a bottom of the disk and rested on the
5 magnetic blocks.

6. The hockey playing table in accordance with claim 5, wherein the magnetic plate has a circular shape.

7. The hockey playing table in accordance with claim 5, further comprising a loop-shaped boundary frame mounted on a periphery of the main
10 body.

8. The hockey playing table in accordance with claim 5, wherein the top face of the panel is formed with a plurality of receiving recesses to receive the magnetic blocks.

9. The hockey playing table in accordance with claim 5, wherein the
15 magnetic plate has a contact face having a polarity the same as that of a contact face of each of the magnetic blocks, so that the magnetic plate produces a repulsive force to the magnetic blocks when the disk and the magnetic plate are rested on the magnetic blocks.
